7h

Distance

55,05 km

Recommendations

- Find out about weather conditions and possible weather developments.
- Exercise extreme caution, especially on cold winter days, foggy or rainy days and hot summer days.
- Plan the activity and its duration, consult the guides and the route map.
- Carry appropriate equipment for your activity. Weather changes can be very sudden.
- Always go with someone else or tell someone else about the planned activity. If you go in a group, always keep in contact with others.
- Do not leave the marked trails or take any shortcuts, as they encourage soil erosion.
- Do not leave waste in the park. Take it with you and leave it in the appropriate containers or bins.
